EDUCATION BACKGROUND

The Chinese University of Hong Kong *Sep. 2026 - Aug. 2027*
Master of Science in Computer Science *Hong Kong, China.*
Harbin Institute of Technology, Shenzhen *Sep. 2022 - Jun. 2026*
Computer Science and Technology *Shenzhen, China.*

- **GPA:** 89.8/100
- **Exchange: City University of Hong Kong** (*Sep. - Dec. 2024*)

RESEARCH INTEREST

My research focuses on **Multimodal** and **Data Centric AI**, with a focus on advancing **multimodal understanding**, **reward modeling** for image generation and editing, and **robust cross-modal learning**.

PUBLICATIONS

[1] Yancheng Long*, Yankai Yang*, Hongyang Wei, Wei Chen, TiankeZhang, Changyi Liu, et al., "SpatialReward: Bridging the Perception Gap in Online RL for Image Editing via Explicit Spatial Reasoning". **[ICML 2026]**[Website][Paper]

[2] Shuo Yang, **Yancheng Long**, Yujie Wei, Zeke Xie, Hongxun Yao, Min Xu, Liqiang Nie, "Noisy Correspondence Rectification in Multimodal Clustering Space for Cross-modal Matching". **[TPAMI 2025]** (student first author)[Paper]

RESEARCH & PROFESSIONAL EXPERIENCE

Kuaishou Technology *Sep. 2025 - Present*
Multimodal LLM Algorithm Researcher (Kling- Keye Multimodal Foundation Model Team - kStar) *Beijing, China.*

- **Keye-VL Multimodal Foundation Model Training:** Led post-training for **Keye-VL-2.0-30B-A3B**[Technical Report] using general RL and video training. Proposed DeltaVid **(P.4, UR)**, a cross-video spot-the-difference proxy task; built DeltaVid-10K and DeltaVid-Bench, turning local spatiotemporal differences into verifiable supervision to improve video understanding.
- **Video Agent Capabilities :** Built VideoNexus, a general visual-understanding agent system, to support Kling understanding and generation needs, including Agentic-QA, Long-Video-Memory maintenance, Video-Editing, film and television Highlight Detection, and structured Captioning.
- **Multimodal Reward Modeling and Reinforcement Learning:** Proposed SpatialReward **(P.1, ICML '26)**, a generative spatial-reasoning reward model. Subsequently proposed SpatialFlow-GRPO **(P.3, UR)**, which turns region-aware rewards into semantic-region-level optimization signals for fine-grained spatial credit assignment. Also proposed Joint Reward Modeling **(P.5, UR)**, jointly supervising human preferences and spatial reasoning for accurate and efficient reward modeling.
- **Spatial Reasoning & Image Editing:** Co-developed bridging frameworks for spatial reasoning generation **(P.6, UR)** and scalable multi-reference image editing architectures **(P.7, UR)**.

THUNLP Group & ModelBest.Inc *Apr. 2025 - Sep. 2025*
Omni-modal Algorithms Intern (Top Talent Plan - Foundational Models Department) *Beijing, China.*

- Contributed to the MiniCPM-o 4.5 through end-to-end, low-latency speech generation, Audio-RLHF training, advanced emotional-control audio capabilities, and dataset construction. [Project Page]

iLearn Lab (Topic: Noisy Correspondence Learning & MLLM) *Dec. 2024 - Present*
Research Assistant (Supervisor: Prof. Shuo Yang, Harbin Institute of Technology, Shenzhen) *Shenzhen, China.*

- **BiCro++ (P.2, TPAMI)** tackles noisy correspondence in cross-modal matching by leveraging bidirectional similarity consistency to generate soft labels, effectively filtering misaligned image-text pairs.

AWARDS

- **Academic Awards:** 2023-2024 Second Prize Scholarship for Undergraduate Student (15%)
- The 15th LanQiao Programming Contest Group A (C) · Provincial Second Prize
- 2023 China Undergraduate Mathematical Contest in Modeling · Provincial Second Prize
